ABOUT ME

Computer Science and Business Systems undergraduate with practical experience in Frontend Development, Workflow Automation, and API Integration. Proficient in HTML, CSS, JavaScript, Python, MySQL, and n8n, with experience building responsive web applications and automated workflow solutions. Currently enhancing Full Stack Development skills while exploring AI-driven automation and scalable software solutions.

WORK EXPERIENCE

Jun 2025 - Jul 2025

Web Developer Intern | Easy Fix Expert, Karaikudi

- Developed responsive web pages using HTML, CSS, JavaScript, Bootstrap, and Tailwind CSS, improving mobile accessibility and cross-device compatibility by 40%.
- Built and optimized UI components, enhancing user experience and interface responsiveness by 35% across multiple screen sizes.
- Collaborated with the development team on a live project, contributing to frontend feature implementation and reducing development turnaround time by 20%.

Automation Intern | Mappln-Out

Feb 2026 – Apr 2026

- Developed and deployed n8n-based email automation workflows, reducing manual communication efforts by approximately 60%.
 - Built and integrated a Telegram bot automation system, improving real-time notification delivery and response efficiency by 50%.
 - Connected multiple platforms through REST API integrations, streamlining workflow execution and reducing manual data handling by 40%.
-

PROJECTS

Android Mobile App – SoundTrack

Tech Stack: Java, Android Studio

- Built a music streaming Android application using Java, focusing on frontend development, navigation, and user interface implementation.
- Designed responsive and interactive mobile screens following modern Android UI principles to enhance user experience and usability.

AI-Powered Email Automation System

Tech Stack: n8n, Gmail API, Ollama, Google Sheets

- Developed an AI-powered email automation workflow using n8n, Gmail API, and Ollama to automatically monitor emails and generate intelligent responses.
- Integrated Google Sheets for data logging and automated end-to-end email processing, improving communication efficiency and reducing manual effort.

AI-Powered Telegram Automation Assistant

Tech Stack: n8n, Telegram Bot API, Google Calendar, Google Tasks, Ollama

- Developed an AI-powered Telegram assistant using n8n and Ollama to automate task management, schedule tracking, and user interactions.
- Integrated Google Calendar and Google Tasks APIs to create events, manage tasks, and retrieve schedules through automated Telegram workflows.

AI-Powered News Automation System

Tech Stack: n8n, Ollama, Gmail, News API

- Developed an automated news aggregation workflow using n8n and News API to collect, process, and organize news from multiple sources.
- Integrated Ollama AI and Gmail to generate concise news summaries and deliver personalized updates through automated email notifications.

TECHNICAL SKILLS

Programming Languages: Python (Basic), Java (Intermediate), JavaScript
Frontend: HTML, CSS, Bootstrap
Databases: MySQL, SQL
Automation & Tools:n8n (Workflow Automation), REST API Integration
Tools: Figma, Adobe Photoshop, Blender, Android Studio
Productivity: MS Office, Video Editing, Git/GitHubs
